General Information
In achieving certification, the Certified Medical Laser Safety Officer (CMLSO) recognizes and assumes the responsibilities due to the practice of laser safety. As a requirement of being certified, such persons act professionally, safely and in accordance with the Code of Professional Conduct. Each certificant has a professional and ethical obligation to practice only in those areas of laser safety in which he or she is competent. The CMLSO has a commitment to remain professionally active in the field of laser safety by maintaining certification. As the industry and technology changes, so must the knowledge of the CMLSO.

This guide is intended to help candidates prepare for the CMLSO examination by giving them references to research and study. However, use of the guide by itself will not be adequate preparation for the exam.

The references given in this guide are intended to provide candidates with reference material related to the general topics covered in the exam. This does not mean to imply that study of these references, only, will ensure successful performance on the examination. This listing is by no means complete; candidates may need to consult additional reports, journals and textbooks for additional information not provided in the references below.

At the same time, not all of these references are necessary to successfully complete the examination. They are provided as a guide to the type of material that should be studied.

Information regarding requirements for certification, exam dates and locations, and applications and fees are available from:

Board of Laser Safety
13501 Ingenuity Drive, Suite 128
Orlando, FL 32826
407.985.3810 or 800.345.2737
FAX: 407.380.5588
Email: bls@lasersafety.org
Webpage: http://www.lasersafety.org

Caution - The information in this guide about the exam and other matters are believed to be correct at the time of publishing; however, the candidate is advised to review the current copy of the CMLSO Policies & Procedures Manual.
**Examination Information**

This examination is multiple-choice, consisting of 100 questions. Each question has a possibility of four (4) answers. Here are a few issues to consider prior to beginning the examination:

1. Allow yourself time to answer all questions.
2. Answer the questions you are sure of first, then go back and answer the remaining ones.
3. Answer all questions even if you are unsure of the answer. An educated guess is better than no guess at all.
4. If you are unsure of an answer, your first instinct is usually the correct one.

There are eight (8) areas of practice on the subject matter of laser safety. Each area of practice is broken down into tasks performed by an MLSO. To assist you in understanding the subject matter, the areas of practice and related tasks are provided here.

**Area of Practice I – Lasers & Optics Fundamentals – 13%**

- Task 1 – Definitions
- Task 2 – Properties of Laser Light
- Task 3 – Laser Output
- Task 4 – Laser Types & Wavelengths
- Task 5 – Electromagnetic Spectrum
- Task 6 – Laser Components & Delivery Systems
  a. How Lasers Work

**Area of Practice II – Laser Tissue Interactions – 13%**

- Task 1 – Photoacoustic (Electromechanical)
- Task 2 – Photoablative
- Task 3 – Photothermal
- Task 4 – Photochemical

**Area of Practice III – Laser Beam Hazards of Eye & Skin – 16%**

- Task 1 – Effects on the Eye
  a. Structure and Function of the Human Eye
  b. Optical Gain of the Eye
  c. Parameters Needed to Determine Maximum Permissible Exposure (MPE)
  d. Retinal Effects
  e. Corneal Effects
- Task 2 – Effects on the Skin
- Task 3 – Specular and Diffuse Reflections

**Area of Practice IV – Non-beam Hazards Associated with Lasers – 11%**

- Task 1 – Laser Generated Airborne Contaminants (LGAC)
- Task 2 – Compressed Gasses
- Task 3 – Laser Dyes and Solvents
- Task 4 – Electrical Hazards
Task 5 – Fire Hazards
Task 6 – Explosion Hazards

Area of Practice V – Regulations and Standards – 15%
Task 1 – Knowledge of ANSI Z136.1 American National Standard for Safe Use of Lasers
Task 2 – Working knowledge of ANSI Z136.3 American National Standard for Safe Use of Lasers in Health Care
Task 3 – Regulatory Agencies
   b. Occupational Safety & Health Administration (General Duty Clause)
   c. Joint Commission on Accreditation of Healthcare Organizations (JCAHO)/Accreditation Association for Ambulatory Health Care (AAAHC)
Task 4 – IEC 60825-1 Safety of Laser Products

Area of Practice VI – Laser Hazard Classification & Controlled Areas – 13%
Task 1 – Laser Hazard Classification
Task 2 – Nominal Hazard Zone
Task 3 – Laser Treatment Control Area (LTCA)

Area of Practice VII – Procedural Control Measures – 12%
Task 1 – Personal Protective Equipment (PPE)
Task 2 – Controlled Access
   a. Laser Warning Signs & Labels
   b. Laser Protective Barriers and Curtains
   c. Authorized Personnel
Task 3 – Test Firing/Calibration
Task 4 – Control of Fire Hazards
Task 5 – Standby and Emergency Off Controls
Task 6 – Footpedal Controls
Task 7 – Key Control
Task 8 – Smoke Evacuation
Task 9 – Electrical Hazard Controls

Area of Practice VIII – Administrative Control Measures – 7%
Task 1 – Policies and Procedures
   a. Airway Management Protocols
   b. Service and Maintenance
Task 2 – Education & Training
Task 3 – Laser Audits
Task 4 – Accident Investigation
Task 5 – Documentation
Task 6 – Duties and Responsibilities of an LSO
**Suggested Study References**

A prerequisite to taking this exam is completion of a Medical Laser Safety Officer (MLSO) course. If it has been a few years since you took the MLSO course, you are encouraged to consider taking an Advanced Medical Laser Safety Officer training course or Medical Laser Safety Officer Online course for review purposes.

In general, there are two (2) main references necessary for anybody interested in taking this exam. This exam is based on these publications and they contain information included in most, or all, of the areas of practice:

This reference manual is comprised of some very informative websites, web pages, web tutorials, training modules, journal papers and articles written about lasers and laser safety. If, while studying for this exam, you come across a useful reference that is not listed here, please let us know. We will review the source and possibly include it in future revisions of this document.
